

## O&M Hand Terminal 19910

### Overview

The hand held Terminal is ideal for the Operation and Maintenance of solar plants. As this is battery driven it can be used in the field by technical people and the stored data can be later uploaded to iPLON O&M Portal and SCADA. As the device works for 8 hrs with battery back-up, this is designed and made for the O&M issues in a solar plant.

### Interfaces

- Ethernet / TCP\_IP and GPRS connectivity
- USB Port
- Lonworks ( field devices)
- Modbus : RS485
- Direct or with Docking station 230 V AC charger

### Functionality

- All weather station ( RS485 / Modbus) Testing and calibration Tool ( with external sensors)
- Testing of SMUs ( Field string monitoring units)
- Testing of Inverter Interfaces ( Modbus)
- Testing of Energy meters

Rev 2.1 06/2012 subject to technical changes.
